

# Out on the Town

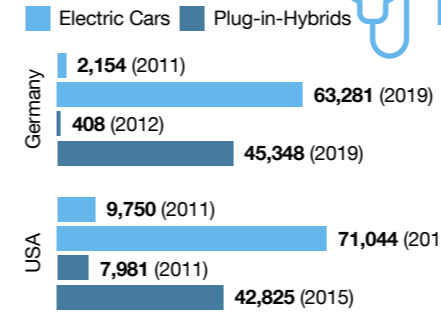

With e-bikes, ridesharing, and last mile services, the way we move around in cities is changing rapidly. We provide insight into trends in private and public transport, and on the last mile.

Text Carina Belluomo and Susanne Spatz

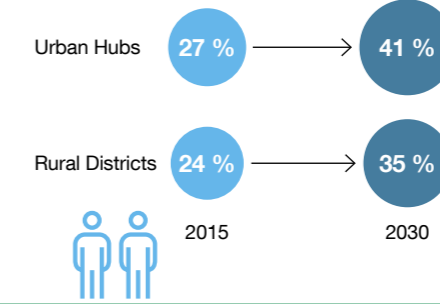

## PRIVATE TRANSPORT

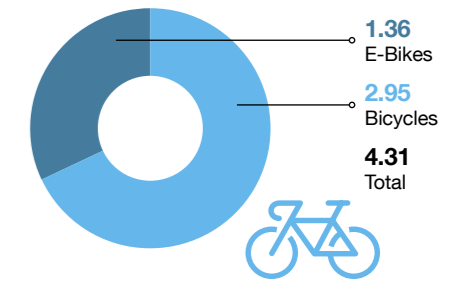

### New registrations <sup>(1)</sup>

### Increase in proportion of foot traffic in Germany <sup>(2)</sup>

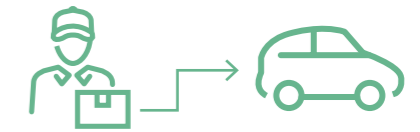

### Sale of e-bikes and bicycles in Germany (in millions; 2019) <sup>(3)</sup>

## PRIVATE TRANSPORT / LAST MILE

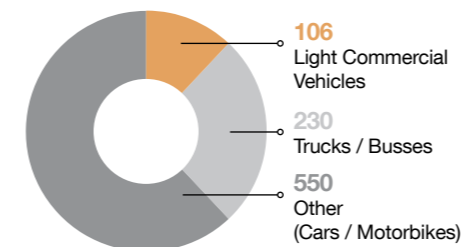

### A special kind of parcel delivery in the USA <sup>(4)</sup>

In 37 US cities, Amazon Prime customers with new, connected models of GM or Volvo vehicles can use the "Key In-Car" service and have packages delivered to their trunks.

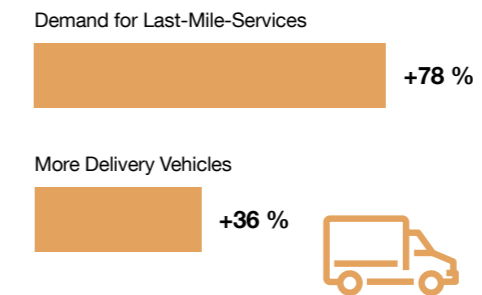

## LAST MILE

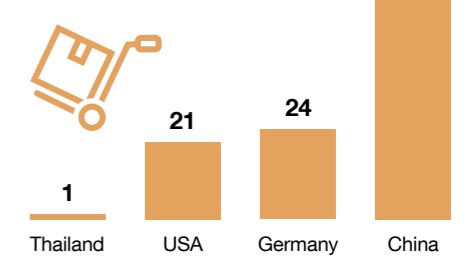

### EU: CO<sub>2</sub> emissions from road transport (in millions of metric tons; 2017) <sup>(5)</sup>

### 2030 forecast in the top 100 cities worldwide <sup>(6)</sup>

### Package orders per head (per year) <sup>(6)</sup>

## LAST MILE / SHARING / PUBLIC TRANSPORT

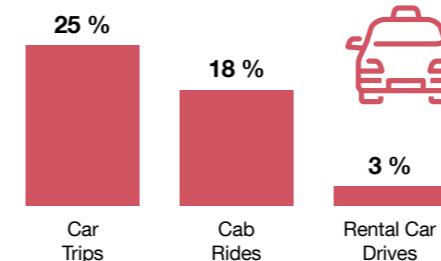

### "Best Idea 2019" <sup>(7)</sup>

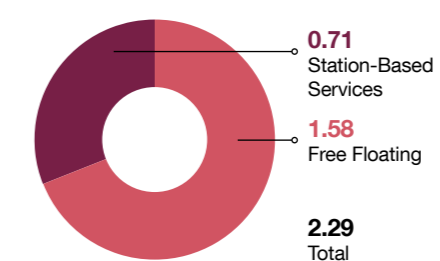

A research group from the Frankfurt University of Applied Sciences received the Pro-Rail-Alliance's 2019 prize for "Best Idea 2019": trams taking over the transport of parcels. The last few kilometers are covered by cargo bikes.

## SHARING / PUBLIC TRANSPORT

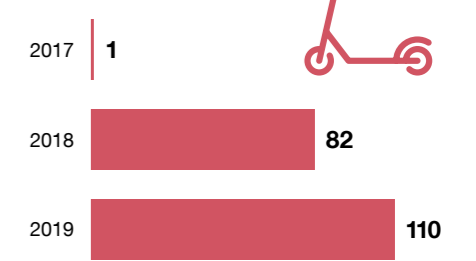

### USA: on-demand services to replace conventional travel (2019)

### Car sharing users in Germany (in millions; 2020) <sup>(8)</sup>

### Cities with e-scooter services in the USA <sup>(8)</sup>
